SUMMARY

Final-year B.Tech Computer Science Engineering student specializing in Machine Learning and Data Analysis. Proficient in Python, SQL, and core ML fundamentals, with hands-on experience building and deploying end-to-end ML projects using real-world datasets. Seeking a Data/ML role to apply analytical and modelling skills to solve real business problems.

SKILLS

Programming Languages: Python, C++, SQL

Machine Learning: Supervised Learning, Regression, Classification, Feature Engineering, Model Evaluation

Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Flask

Data Structures & Algorithms: Arrays, Strings, Recursion, Sorting/Searching, Problem Solving (HackerRank Certified)

Version Control: Git, GitHub

PROJECTS

AI-Powered Health Risk Predictor | *Python, Scikit-learn, Flask, Pandas*

- Built and trained a classification model to predict patient health risk levels, achieving 75% accuracy on a held-out test set of 154 records.
- Performed data cleaning, preprocessing, and feature engineering on real-world health datasets using Pandas and NumPy.
- Designed and deployed a Flask web application enabling real-time risk predictions from user-input health parameters.
- Evaluated model performance using precision, recall, and F1-score to validate reliability across risk categories.

House Price Prediction | *Python, Scikit-learn, Pandas, Matplotlib*

- Built and compared multiple regression models (Linear Regression, Random Forest) to predict housing prices, achieving an R^2 of 0.65 / RMSE of ₹227,768.
- Conducted exploratory data analysis on property records to identify key price-driving features.
- Applied feature engineering and cross-validation to improve model generalisation.
- Visualized feature correlations and price trends using Matplotlib to support model interpretation.

Used Bike Price Prediction | *Python, Scikit-learn, Pandas*

- Developed a regression model to predict used bike prices from specifications and historical listing data across 25,321 records.
- Cleaned and processed noisy real-world data, applied feature engineering and data preprocessing to improve model performance, achieving R^2 of 0.764.
- Evaluated model performance using MAE and RMSE, iterating on features to reduce prediction error.

CERTIFICATIONS

Data Science with Machine Learning & AI – Internship & Training Program, Upflairs Pvt. Ltd. (June 2025 – July 2025)

HackerRank: Python (Basic), Problem Solving (Basic), Problem Solving (Intermediate)

EDUCATION

Arya College of Engineering, Jaipur 2023 – 2027

Bachelor of Technology (B.Tech) – Computer Science Engineering | **CGPA: 7.57 / 10**
